

**AMERICAN
UNIVERSITY OF BEIRUT**
FACULTY OF ARTS & SCIENCES

MA IN COMPUTING IN EDUCATION

EARN AN ONLINE MASTER'S

ABOUT THE PROGRAM

The **MA in Computing in Education** is an interdisciplinary program bringing together education and computer science. It is an exclusive degree delivered in an online asynchronous format, providing students with the flexibility to learn at their own pace.

Participants will become highly skilled instructional designers who will act as key players in innovating teaching and learning practices and advancing core computer science curricula in schools. Join this distinct learning journey to accelerate your career growth and gain transferable in-demand skills to venture into new industries.

PROGRAM FORMAT

100%
online courses

**LIVE
INTERACTIVE
SESSIONS**

ASYNCHRONOUS

LEARNING EXPECTATIONS

- Design and deliver computer science courses in K-12 classrooms as well as in a variety of formal and informal settings.
- Master the different kinds of instructional design models to independently develop and implement online learning courses, workshops, and programs.
- Actively research contemporary issues and learning theories in the areas of accessible and inclusive education, instructional design, and computer science.
- Acquire the necessary expertise to teach programming and computational thinking by learning languages such as Python.

WHO'S THIS PROGRAM FOR?

This master's is open to students from all backgrounds! All you need is a bachelor's degree in any field. This program is particularly suitable for:

Applicants striving for career advancement and are interested in computing and educational technology.

Education graduates searching for a unique specialization to improve their employability prospects.

Computer Science graduates seeking to break into the fields of education and instructional design.

CURRICULUM

The MA in computing in education follows an online asynchronous format delivered through a set of engaging self-paced modules within a structured learning path.

COURSES	DESCRIPTION
EDUC 371 DIGITAL CITIZENSHIP	Delve into the ethics of technology related to responsible behavior when accessing, managing, exchanging, and disseminating information electronically.
EDUC 372 FOUNDATIONS IN DISTANCE EDUCATION	Equip yourself with the academic and practical fundamentals of online learning. Learn to deliver distance education in formal and informal settings, particularly for students in K-12 settings and adult learners in higher education.
EDUC 373 INSTRUCTIONAL DESIGN AND DEVELOPMENT	Gain insight into the basic principles, tools, and techniques required for instructional design.
EDUC 374 TECHNOLOGY AND INFORMATION SYSTEMS FOR TEACHERS AND ADMINISTRATORS	Explore the use of technology and information systems in schools at the administrative level, learning about how different information systems› tools and applications are used in the educational environment for decision-making, planning, and communication.
EDUC 375 TRENDS AND ISSUES IN EDUCATIONAL TECHNOLOGY	Reflect on the roles various forms of digital technology play in the teaching and learning processes and how instructors can engage these processes in classroom settings. Students will be able to critically analyze the implications of past, current, and future developments in educational technology.
EDUC 300 INTRODUCTION TO EDUCATIONAL FOUNDATIONS AND PRACTICE	Learn about the theoretical and practical underpinnings of organizational structures, curriculum delivery, external examinations, and ethical and legal aspects of the teaching profession.
EDUC 315 PSYCHOLOGY OF EDUCATION	Dive into a comprehensive analysis of instructional theories, measurement skills, cognitive development, learning theory, and the methods of applying behavior modification in classrooms.
EDUC 321 GENERAL RESEARCH METHODOLOGIES IN EDUCATION	Develop a scientific approach to solving educational problems, identify and develop research problems while tackling a variety of research designs.
CMPS 301 PROGRAMMING AND COMPUTATIONAL THINKING	Gain insight into various topics in computer science, preparing you to teach programming and computational thinking in schools using the Python programming language.
CMPS 302 COMPUTING SYSTEMS	Learn about the principles of computer operations from both the hardware and software perspectives, basic networking concepts, web authoring concepts including HTML, cascading style sheets, and data manipulation using spreadsheets and databases.
CMPS 303 GAMING AND ROBOTICS	Learn to use proven research-based best practices to improve the integration of science, technology, engineering, and mathematics to master rigorous, real-world learning experiences including gaming, robotics, and design technology.
CAPSTONE PROJECT	Put theory into practice and apply your newly acquired skills to design and implement innovative curricula.

*Students with a background in education or computer science can apply to have credits waived.
**If you have already completed the Diploma in Online Education, you can have all 12 of your diploma credits transferred towards this MA.

READY TO JOIN THE PROGRAM?

REQUIREMENTS & ADMISSIONS

This Diploma is open to students from all backgrounds. No previous experience is required!

All you need is:

- A bachelor’s degree from a recognized institution
- To meet AUB’s English proficiency standards
- Two recommendation letters
